# Finance Ministry proposes common income tax return forms for all taxpayers

New Delhi, Nov 2: In a bid to make tax return filing simpler and less time-consuming, finance ministry has proposed a common ITR form by merging all the existing returns of income except ITR 7.

However, the current ITR 1 and ITR 4 will continue, according to the ministry notification. With this, the taxpayers will have an option to either file the return in the existing (ITR1 or ITR4) or the proposed common ITR, at their convenience.

Under the common ITR, all the taxpayers will have to give certain basic information and details of bank accounts. Schedules for computation of total income, computation of tax, and a schedule for the tax payments will be applicable for all.

The tax department says that new proposed ITR has been designed in a much user-friendly way.

“The taxpayers will not be required to see the schedules that do not apply to them. It intends the smart design of schedules in a user-friendly manner with a better arrangement, logical flow, and increased scope of pre-filling. It will also facilitate the proper reconciliation of third-party data available with the department vis-a-vis the data to be reported in the ITR to reduce the compliance burden on the taxpayers,” the notification stated.

Under the existing system, there are seven kinds of Income Tax Returns forms – ITR-1 to ITR-7. taxpayers can choose from one of the seven depending on their source of income. “The new common ITR form would be available in parallel to old forms in ITR-1 and ITR-4 and the assessee belonging to ITR-1 and ITR-4 categories could choose to file old forms or the

new, depending on convenience. Taxpayers filing return of income in Forms ITR-2, ITR-3, ITR-5 and ITR-6 would not have an option to file the old forms, once the new common form and related utility are notified,” according to the Sandeep Jhunjhunwala, Partner, Nangia Andersen LLP.

As per Jhunjhunwala, the proposed draft of the new ITR form is designed to facilitate suitable reconciliation of third-party data available with the Income-tax Department vis-a-vis data to be reported in ITR, to reduce compliance burden on taxpayers.

Common ITR form for all

Under the common ITR, taxpayers will have to give basic information and details of bank accounts. Schedules for computation of income, tax, and a schedule for tax payments will be applicable for all.

## VS Hospitals’ initiative on breast cancer awareness

Chennai, Nov 2: VS Hospitals in association with Ethiraj College for Women today formed a “Pink Ribbon” to raise awareness on Breast Cancer. Around 800 students from Ethiraj College for Women stood together carrying a pink umbrella to form a pink ribbon on the Madras University ground at Chetpet.

During the Breast Cancer Awareness event held at Chetpet VS Hospitals’ new initiative “Pink India Movement” was launched by the Minister of Health Ma Subramanian in the presence of

V. M. Muralidharan, Chairman - Ethiraj College for Women, Prof. Dr. S. Subramanian, Founder Chairman & Managing Director - VS Group of Hospitals, Prof. Dr. S. Sundar, Medical Director, VS Group of Hospitals. The Pink India Movement was started to spread awareness about breast cancer among women and propagate the need for early detection and regular screening all through the year.

Speaking at the event, Ma. Subramanian elaborated on the

magnitude of the disease, “Breast cancer is one of the most common and aggressive forms of cancer in India and more than 2 lakh women in India were estimated to have been diagnosed with breast cancer in 2020. One woman gets diagnosed with breast cancer every 4 minutes in India, and one woman dies of breast cancer every 13 minutes. The average age of developing breast cancer has also undergone a significant shift from 50 - 70 years to 30 - 50 years. There has been a recent increase in breast cancer in younger women.”

Prof. Dr. S. Subramanian, Senior Most Practising Medical Oncologist in the Country and Founder Chairman & Managing Director, VS Group of Hospitals said, “Breast cancer accounts for 25% to 32% of all cancers in women in Indian cities and is the second most common cancer in rural areas. Incidence of breast cancer in Chennai is the highest at 42.2 per lakh (age-adjusted rate AAR). Those with a genetic predisposition, have a higher risk of breast cancer.”

## Mahindra’s Farm Equipment records highest tractor sales

Chennai, Nov 2: Mahindra & Mahindra Ltd.’s Farm Equipment Sector (FES), part of the Mahindra Group, today announced its tractor sales numbers for October 2022.

Hemant Sikka, President said, “We have sold 50539 tractors

in the domestic market during October 2022, a growth of 11% over last year. Festive season kept the spirits high and led to very strong momentum in demand for tractors and farm machinery. The recent Government announcement of higher MSP for key Rabi crops,

good moisture content in the soil, high reservoir levels and good progress in sowing for Rabi crops are all positives for continued good demand for tractors in coming months. In the exports market, we have sold 1455 tractors.”

## India’s gold demand hits pre-pandemic levels

Chennai, Nov 2: India’s gold demand has reached pre-pandemic levels and has witnessed an annual growth of 14 per cent during the July-September quarter at 191.7 tonnes mainly driven by strong consumer interest, according to a World Gold Council (WGC) report.

According to the ‘Gold Demand Trends Q3 2022’ report by WGC, the total demand stood at 168 tonnes during the July-September quarter of 2021.

In value terms, gold demand grew by 19 per cent to Rs 85,010 crores during the third quarter of 2022, compared to Rs 71,630 crores in the corresponding period of 2021.

India’s total gold demand in the third quarter of 2022 at 191.7 tonnes is a 14 per cent increase over last year, which reflects better-than-expected performance and strong consumer interest, helping year-to-date demand return to pre-COVID levels, Somasundaram PR, Regional CEO, India, World Gold Council told PTL.

Meanwhile, total jewellery demand in India during the third quarter increased by 17 per cent at 146.2 tonnes, compared to 125.1 tonnes in the same period last year.

Value-wise jewellery demand was up by 22 per cent at Rs 64,860 crore during the quarter under

review, from Rs 53,330 crore in July-September 2021.

“Credit expansion added impetus to this demand, with bank loan growth touching a nine-year high by quarter-end. Recovery in gold jewellery demand was primarily driven by urban India, more specifically southern parts, underpinned by robust economic activities with a 17 per cent y-o-y increase in tonnage terms,” Somasundaram noted.

However, he said, rural demand was impacted by seasonal effects (monsoons) and inflation and on the other hand, Indian bar and coin demand also saw a 6 per cent y-o-y improvement to 45.4 tonnes as retail investors responded to gold price drop and weaker equity markets, and festivities around Ganapati and Puja festivals after 2 years of COVID, saw a huge uplift in consumer sentiment.

“Looking ahead, Indian retail investment is likely to continue to benefit from safe-haven demand amid rising interest rates and a weakening rupee. There’s optimism in the overall outlook for the rest of the year with weddings and Diwali demand in the fourth quarter, but it is unlikely to match last year’s record-breaking performance. Our gold demand estimate for the full year is around 750-800 tonnes similar to last year,” he added.

Talking about imports, he said in 2021 the imports stood at 1,003 tonnes and this year, keeping all the ongoing market sentiments in mind, WGC doesn’t expect to exceed last year’s level.

This year, the country has imported 559 tonnes of gold in the first three quarters, Somasundaram added.

Meanwhile, gold prices in the country have witnessed a decline of 4 per cent during the second and third quarter, Somasundaram said, adding that the average price of the yellow metal during the April-June period was RS 46,430 per 10 grams (without Customs duty and GST).

The average price during the third quarter was Rs 44,351 per 10 grams, he added.

Investment demand increased by 6 per cent to 45.4 tonnes during the third quarter of 2022, compared to 42.9 tonnes in the same period of last year.

In value terms, gold investment demand in the third quarter was Rs 20,150 crores, up by 10 per cent from Rs 18,300 crores in the same period last year.

Total gold recycled in India during the third quarter this year was 16 tonnes, which is down by 23 per cent compared to 20.7 tonnes in the corresponding period of 2021.

## TVS sees hike in sales in Oct

Hosur, Nov 2: TVS Motor Company registered a growth of 2 percent with sales increasing from 355,033 units in October 2021 to 360,288 units in October 2022.

Total two-wheelers registered sales of 344,630 units in October 2022 as against sales of 341,513 in October 2021. Domestic two-wheeler sales registered growth of 7 percent increasing from 258,777 units in October 2021 to 275,934 units in October 2022.

Motorcycle regis-

tered sales of 164,568 units as against sales of 172,361 units in October 2021. Scooter registered a growth of 20 percent with sales increasing from 113,124 units in October 2021 to 135,190 units in October 2022.

“The market sentiments for all our products have been very positive. We are optimistic that the demand in the domestic two-wheeler market will continue,” the company said.

TVS iQube Electric continued to garner great response from customers,

showcasing a strong sales growth of 8,103 units in October 2022 as against sales of 395 units in October 2021.

The company’s total exports registered sales of 82,816 units in October 2022 as against sales of 95,191 units in October 2021. Two-wheeler exports registered sales of 68,696 units in October 2022 as against 82,736 units in October 2021.

“In some international markets, there has been a slowdown due to macro-economic factors.

These are predominantly two-wheeler markets and hence we have moderate despatches in these countries,” the company said.

However, the company has seen some retail improvement in these markets in October which will support improved despatches in the coming months.

The three-wheeler of the company grew by 16 percent registering sales of 15,658 units in October 2022 as against 13,520 units in October 2021

## Food Secretary will be the Civil Supplies Chairman

Chennai, Nov 2: The Tamil Nadu government has replaced Minister for Food and Civil Supplies R. Sakkarapani with J. Radhakrishnan, Principal Secretary, Cooperation, Food and Consumer Protection, as the Chairman of the Tamil Nadu Civil Supplies Corporation (TNCS). The order was issued on October 21. For about one-and-a-half years, the DMK government followed the practice — started by the AIADMK government in July 2014 — of having the Food Minister as the TNCS Chairman. In July 2014, the then Food Minister, R. Kamaraj, was made the Chairman, a position held till then by a civil servant, M.P. Nirmala, who was the Food Secretary. This was a deviation from the tradition of having

senior civil servants as the head of the TNCS since its establishment in 1972.

Experts say it is a “sensible move” on the part of the government to have put the Secretary of the Department concerned back as the TNCS Chairman.

Meanwhile, the TNCS has been going ahead with paddy procurement. So far, nearly eight lakh tonnes have been procured through around 1,500 DPCs. This is about 2.5 lakh tonnes higher than last year’s procurement. The procurement is expected to gather speed as the Centre has relaxed moisture content by 2% — from 17% to 19% — for the paddy procured in Thanjavur, Tiruvallur, Mayiladuthurai, Nagapattinam and Tiruchi.

## Dollar at Rs. 82.70

Mumbai, Nov 2: The Rupee on eased by one paisa at 82.70 today against the green-back on rising demand for US Dollar by bankers and importers, dealers at Foreign Exchange said.

The local unit declined on strong Dollar against other world currencies amid weak stock market in early trade.

The Rupee recorded intra days high and low at 82.65 and 82.74 respectively

## AdaniConneX boosts India’s current digital capabilities

Chennai, Nov 2: Infrastructure is the core to nation building and the next wave of nation-building is on the digital front. AdaniConneX is building a network of data center infrastructure across the country for augmenting and boosting India’s current digital capabilities in a sustainable manner. Its Chennai 1 Data Center is live now.

With an integrated terrestrial fibre and global submarine cable connectivity, Chennai emerges as a major data center hub in the APAC

region. AdaniConneX’s ‘Chennai 1’ Data center with a total capacity of 33MW (IT load) is strategically positioned to support rising demand in the region.

Located in the SIPCOT IT Park for easier access with redundant power and network connectivity - Chennai 1 is one of the largest Data Center Colocation facilities in the region. Chennai 1 is designed to offer robust protection to IT Infrastructure with 7 layers of security system, with commitment to provide 99.999%

availability.

Chennai 1 data center is built with a laser focus on sustainability and will be powered with up to 100% renewable energy. The facility is also Tamil Nadu’s first pre-certified IGBC Platinum Rated data center.

AdaniConneX is a 50:50 joint venture between Adani Group and EdgeConneX, established with a common goal of developing a 1 GW national data center platform to empower Digital India. Adani Group, as India’s largest private infrastructure and

energy provider, along with EdgeConneX, a global expert in data center solutions for more than 10 years with 50+ Edge, hyperscale and built-to-suit data centers, is a real coming together of two worlds.

## HDFC ERGO launches Farm Yield Insurance Policy

Chennai, Nov 2: HDFC ERGO General Insurance Company, a leading general insurance company of India, announces the launch of an innovative and technology backed farm yield insurance policy for farmers. This is a first-of-its-kind insurance solution, where a satellite based index will be used to provide localised farm level coverage. It will provide comprehensive cover across the crop life cycle from sowing to harvesting, basis satellite based data.

The product is targeted to the farmers under corporate/farm input company (FIC) contracts. A threshold Index value is calculated for every yield by using the historical satellite

imaging data of the specific crop and a remote sensing mechanism available in the public domain. The threshold/benchmark index will be then compared with the actual index value arrived at by the reference satellite for the insured crop, to determine if the yield is at loss. Since this is entirely based on technology, no manual survey is required during the claim assessment of this crop.

Hiten Kothari, Appointed Actuary, HDFC ERGO General Insurance Company, said, “One of the most direct ways disasters affect agriculture is through lower than expected or significant damage to the yield. This causes direct economic loss to farmers which can

cascade along the entire value chain, even affecting the growth of the sector or the entire national economy. As a digital first organisation, the farm yield insurance cover will provide composite insurance to the crops across all stages of the cropping cycle, without the requirement of tedious manual surveys.”
